

Brothers and Sisters,

In recent weeks, we have watched as the City Council voted to sign a new agreement with Local 42 regarding wage and step increases. Under this new agreement, the members of the Fire Department will receive step increases and COLAS effective back to MAY 1, 2011 for this year and additional wage and step increases over the next two years. City employees, as well as some in management will also receive raises this fiscal year. The City has told the Police Department that they will not allocate any additional funds to the Police Department for police raises. All we ask is for parity with other public safety employees, so we ask that you, your family, and friends please contact the mayor and city council asking for parity with public safety employees.
